

PlyVeneer™

Light Yet Strong

The Preferred Shipping Solution

PlyVeneer solves the problem of creating strong, lightweight containers and packaging to minimize shipping costs. Whether the material is routed and folded or used to protect items in shipment, PlyVeneer performs.

Made of a wood veneer with Kraft paper overlay, PlyVeneer is stronger than corrugated products, yet lighter than plywood. It offers the versatility of a shipping workhorse.

Use for Shipping!

- Box shook
- Protective cover sheets
- Drama panels
- Agricultural packaging, especially for soft fruits
- Low cost pallet decks and divider sheets
- Freight car lining

Just the Facts

SPECIFICATIONS

- Cores available in 1/10", 1/8" and 1/6" thickness
- Faced on both sides with tough, heavy 42 lb. or 69 lb. natural brown linerboard
- Available with bleached 42 lb. Kraft linerboard on one side
- Puncture resistant
- V-grooving for folding applications
- Moisture resistant adhesive produces uniform, durable bond between facings and core
- Can replace plywood, OSB or corrugated
- Can be nailed, stapled, screwed or glued
- MDF core can be substituted in applications where surface quality is critical

Cut to size

An 8-foot wide continuous lay-up laminator produces large panels up to 20-feet long. Cut-to-size saws can accommodate orders specific to customer needs.

Shipping
